The seed used was a fraction less than ten leastless, yet up to Saturday last he had sold from this small patch over three hundred dollars soorth of prototoes! Who will dare say that is not a profitable husiness? The printices were sold at an average of \$2 per bushel, but the huck-sters afterwards sold them at an average rate of over \$3 per bushel. Is not this alone a unficient argument for the abolishment of the huckster system?—Alexandria Journal.

#27 A Friend in Need! — Those requiring confidential medical assistance should apply to some regular educated physician who has made certain diseases his special study; such a man is Dr. DARBY, who is daily curing numbers of both sexes, and every age, who have been to all the solf-called doctors in this city, and spent valuable time and money, with a benefit until he took charge of them. His terms are more moderate than those of mere boasting pretenders, whose only purpose is to fleece the infortunate, and then advises them, whom it is almost too late, to apply to him.

Call on him at once, or you may regret it ever afterwards.
